

## Ulexite – Granular B -15% Fertilizer Grade

Boro 15 MSR is a natural product with 15% Boron to be used in the agriculture industry as a fertilizer and growth regulator. This product is a solid and granular pellet usually applied to the soil. In addition, it provides Sulphur (S) and Calcium (Ca) to support healthy growth. Boron enhances the effects of sugars on the hormone action in plants (highly used in Brazil in citrics production with this end), the amount of photosynthesis, the rate of absorption of CO<sub>2</sub> from the air, and the growth of plant roots. Boro15 is the most appropriate product for fertilizers mixing plants which usually add it to NPK formulations together with other micronutrients.

**Cas Number: 1319-33-1**

B	min. 15.00 %
B <sub>2</sub> O <sub>3</sub>	min. 48.00 %
Ca	max. 13.00 %
S	max. 4.00 %
Na	max. 7.00 %
As	max. 0.01 %
Humidity	max. 5.80 %
Boron Solubility (in citric acid at 2%)	min. 97.00 %
Bulk Density	800 kg/ m <sup>3</sup>
Particle Size	Granulated / pellets 2 to 5 mm

**Packing Options: 50 lbs bags, Big Bags/Totes**

This product's controlled release ensures that the plant requirements of Boron are fulfilled as the appropriate amount of Boron is available for plant uptake. As a result, a beneficial application program of the product can be accomplished easily.

The data given above are based on our continuous quality monitoring system. They do not exempt the users from their obligation to make an incoming control of the delivered product. The data are for information purposes only and are not to be taken as a guarantee. It is the responsibility of the users to determine the product's suitability for its intended use.
