

Zinc Sulfate Monohydrate Fertilizer Grade

Zinc Sulfate is highly soluble in water, making it an ideal and popular fertilizer. Both Zinc Sulfate Heptahydrate and Zinc Sulfate monohydrate are suitable for use in all types of soils. A typical application of 15 - 30 lbs/per acre of Zinc Sulfate, containing 36 % Zinc, can last two - three years of crop production.

The cool soil temperatures during spring, can increase the need for Zinc. Areas with finer textured soils and/or where topsoil has been eroded or removed tend to suffer from Zinc deficiency.

Cas Number – 7446-19-7

EINECS Number 231-793-3

Zinc (Zn)	min. 35.5%
Lead (Pb)	20 ppm max
Iron (Fe)	20 ppm max
Cadmium (Cd)	10 ppm max
Copper (Cu)	15 ppm max
Appearance	White Powder

Packing Options: 50 lb bags, Big Bags/Totes
